

Lightforth — Frequently Asked Questions

General Product Questions

What is Lightforth?

Lightforth is an AI-powered career platform that helps job seekers land roles faster. It combines four tools: Resume Builder, Auto-Apply, Interview Prep, and Interview Copilot.

Who is Lightforth for?

Active job seekers in the United States — recent grads, career changers, and people making a move. Also used by career coaches, bootcamps, and university career centers who buy seat bundles for the people they support.

How does Lightforth work?

AI tailors your resume to a specific job description, automatically applies to matching positions (with your approval), simulates interview practice, and provides real-time coaching during the live interview itself.

Is Lightforth free?

There's a free tier with limited credits. Pro (\$49/mo) and Premium (\$79/mo) unlock higher usage and the live desktop Copilot.

Resume Builder Questions

How does the AI resume tailoring work?

Upload your resume and paste the target job description. AI matches your experience to the keywords and requirements in that specific posting — the version you get is different for every job, not a single generic resume.

What is ATS scoring?

A score showing how well your resume will perform against automated screening systems (ATS), with specific recommendations to close the gap.

What formats can I download my resume in?

PDF, Word, or plain text — all ATS-compatible.

Can I create multiple versions of my resume?

Yes, unlimited on Pro and Premium. We recommend a fresh tailored version per application.

Auto-Apply Questions

How does Auto-Apply work?

Set your target roles, locations, and preferences once. Lightforth finds matching open positions and submits applications for you.

Will I know which jobs Lightforth applies to?

Yes — every match is shown to you before submission. Nothing goes out without your review.

Can I customize my application for each job?

Yes — review and edit resume and materials before each submission.

How many jobs can I apply to?

Depends on your credit balance. Pro's 50 credits/month and Premium's 100 both cover a realistic active-search volume; heavy months may need a credit top-up.

Interview Prep Questions

How does the AI mock interview work?

Select your resume and target job, then practice with the AI interviewer. You get a full performance report after every session.

What types of interviews can I practice?

Behavioral, technical, case study, and general — the AI adapts to your target role.

Can I practice with a specific company in mind?

Yes — set the job details for any company and the AI tailors questions and feedback accordingly.

Interview Copilot Questions

What is Interview Copilot?

Real-time AI support during the actual live interview. The candidate shares interview audio (via browser or desktop app); the AI listens and surfaces suggested answers on-screen, right when they're needed.

Is this cheating?

Interview Copilot is a coaching tool, not a script. It surfaces the relevant point from your own resume and experience faster than nerves let you recall it on your own — it doesn't invent an experience you don't have.

Can the interviewer see my Copilot?

No. Suggestions appear only on your own screen.

Does Copilot work for phone interviews, or only video?

Both — audio can come from the desktop app's system audio, a browser tab, or a phone call routed through the desktop app's microphone input.

Coach & Organization Bundle Questions

How does seat pricing work for a bundle?

5-9 seats: 15% off. 10-19 seats: 20% off. 20+ seats: 25% off. All bundles billed annually to the organization.

Can I see what my students/clients are doing in the app?

You can see seat activation and aggregate usage (e.g., how many seats are active), but not an individual's resume, applications, or interview content — that stays private to them.

Can seats be reassigned?

Yes — an unused or inactive seat can be reassigned to someone else at any time at no extra cost.

Do bundle members get the same features as a regular Premium subscriber?

Yes, identical feature access — the bundle only changes who pays and how seats are managed.

Account & Billing Questions

How do I upgrade my plan?

Account → Billing → select new plan. Changes take effect immediately.

Can I cancel my subscription?

Yes, anytime. Monthly plans end at the close of the current billing period; annual plans end at the close of the annual term.

Do you offer refunds?

14-day money-back guarantee on new subscriptions. See [knowledge-center/01-refund-policy.md](#).

Can I change my plan mid-cycle?

Yes — upgrades are immediate and prorated; downgrades take effect at the next billing cycle.

Technical Questions

What browsers does Lightforth support?

Latest Chrome, Firefox, Safari, and Edge. Chrome is recommended.

Is there a mobile app?

Yes, iOS and Android, supporting Resume Builder, Auto-Apply, and Interview Prep. Interview Copilot requires the desktop app for audio sharing.

What are the system requirements?

Modern browser, stable internet, a microphone (for Copilot), and the desktop app (Mac or Windows) for live interview coaching.

How do I contact support?

- **Email:** support@lightforth.ai
 - **Help Center:** [help.lightforth.ai](#)
-

Privacy & Security Questions

Is my data secure?

Yes — encrypted at rest and in transit, GDPR/CCPA compliant. We do not sell your data.

Do you use my data to train AI?

No. AI suggestions are generated in real time using third-party providers under strict data-processing agreements — your content is never used to train models.

Is my interview audio recorded?

Only if you explicitly enable session recording. By default, audio is processed live for Copilot and not persisted.

Can I delete my data?

Yes, anytime — full account and data deletion, processed within 30 days.
