

Lightforth — Onboarding Process (Quick Reference)

Individual Customer

First 15 Minutes

1. Sign up, verify email, upload existing resume
2. Paste a real target job description into Resume Builder
3. Review the tailored resume + ATS score
4. Set Auto-Apply preferences (roles, locations, must-haves)

First Week

- Approve the first Auto-Apply match batch
- Run one Interview Prep session
- If Premium/Pro and an interview is scheduled: download the desktop app, grant screen/audio permissions, run a 2-minute test before the real call

If They Get Stuck

- Resume looks off → check the source resume has real content, not a bare template
 - No Auto-Apply matches → broaden role/location filters
 - Copilot not hearing audio → confirm permissions + correct audio device selected
-

Coach / Organization Bundle

Day 0

- Admin account created, seats provisioned, invite sheet sent

Day 1

- Admin distributes individual invite links/codes to the cohort
- Each person signs up on their own account — content stays private from the org admin

Ongoing

- Admin dashboard: seat activation + aggregate usage only, no individual content visibility
 - Seats reassignable anytime at no extra cost
-

Support

- **Email:** support@lightforth.ai
- **Help Center:** help.lightforth.ai
